

A Venn diagram illustrating the relationship between 'Current Abstraction' and 'Sufficient Abstraction'. A solid dark red circle in the center is labeled 'Current Abstraction'. Two dashed dark red circles overlap with it: one on the left and one on the right. The right dashed circle is larger and positioned lower, with the label 'Sufficient Abstraction' centered below it. The left dashed circle is smaller and positioned higher. The overlapping areas represent the intersection of the two abstraction sets.

Current
Abstraction

Sufficient Abstraction
